

High Strength Marine Adhesive

Clear

- High Strength Permanent Bond
- High Temperature Resistance
- Safe for Marine Use
- Low VOC
- Does Not Contain Any Chemicals on EPA's HAPs List
- Waterproof
- Easy to Use/Non-Staining
- Web Spray With Adjustable Tip

At Westech, our efforts are focused on producing high quality, industrial strength adhesives. We sell our products in a wide variety of markets at a competitive price. With a profound understanding of our customers' needs and years of industry experience, we continue to develop new products and applications to serve our current and future customers.

Westech's HS-MAC18 spray adhesive is ideal for a variety of marine applications common in boat building. In addition, this adhesive is also typically used for applying high pressure laminates to wood or particleboard, cabinet and flooring installations, upholstery, flotation foam, fiberglass and wall and ceiling coverings. This product provides a high strength waterproof bond that can withstand temperatures up to 250°F.

- Safe for marine applications
- Bonds (HPL) plastic laminates to wood or particleboard
- Bonds upholstery to metal
- Bonds fabric to fiberglass

Westech's self contained, environmentally friendly, portable canister system was designed for ease of use. The canister, equipped with a reusable hose and gun, eliminates the need for air-assisted adhesive application systems. This approach significantly reduces worker set up and general maintenance time. Its portability enables you to apply adhesive in your facility as well as on the job site. This product is available in handheld aerosol cans, 9 lb., 27 lb. and 135 lb. canisters.

HS-MAC18 provides a fast tacking, strong, permanent and waterproof bond.

- High Tensile Strength
- High Solids Web Pattern Formulation for Extended Coverage
- Ample Peel Strength
- High Temperature Resistance Level of Bonding

Technical Data

Westech HS-MAC18 product is formulated as a non-methylene chloride, high strength/temperature, and low VOC solvent-based adhesive for marine use.

Technical Data:

- Contains NO chlorinated solvents
- Contains NO HAPs

Performance Features:

- Low VOC levels for use in any location
- Simple clean up with Westech AR Adhesive Remover
- Formulated for rapid application
- Applies easily and adheres to various substrates

Safety Recommendations:

Vapors may be harmful to health. Keep away from children. Use only in well ventilated areas or use respiratory protection. The product MSDS should be read and understood before use. Eye protection is required. This product is flammable. Keep away from fire or flame.

Recommended Usage:

Westech HS-MAC18 is especially formulated to be a high strength, high temperature industrial adhesive applicable to a variety of substrates. This adhesive is suitable for use in many different industries such as marine, woodworking, furniture, high pressure laminates, edgebanding, RV, automotive headliners, upholstery and construction, just to name a few.

Prior to use, a small test patch should be sprayed to evaluate substrate compatibility. This product may degrade some thin plastics and films. Some of the materials HS-MAC18 will effectively bond include: plastic laminate, edge banding, automotive headliners, glass, particle board, felt, paper products, carpet, duct insulation, steel, aluminum, molded fiberglass, wood, urethane foam and many other materials.
