

PS13

Polystyrene Spray Adhesive

Clear and Blue

- Great for High Temperature Conditions
- Fast Tacking
- Excellent Choice for Expanded Polystyrene (EPS) Applications
- Waterproof
- Safe for Use on Polystyrene Foam
- Bonds Rigid Insulation Panels
- Laminates Architectural Shapes
- Tacks Reinforcing Mesh to Foam
- Permanently Bonds EPS to Other Substrates
- Exterior and Interior Applications

At Westech, our efforts are focused on producing high quality, industrial strength adhesives. We sell our products in a wide variety of markets at a competitive price. With a profound understanding of our customers' needs and years of industry experience, we continue to develop new products and applications to serve our current and future customers.

Westech's PS13/PSC13 was formulated for bonding expanded polystyrene foam.

- Bonds EPS to other substrates
- Bonds rigid insulation panels
- Laminates architectural shapes

Westech's self contained, environmentally friendly, portable canister system was designed for ease of use. The canister, equipped with a reusable hose and gun, eliminates the need for air-assisted adhesive application systems. This approach significantly reduces worker set up and general maintenance time. Its portability enables you to apply adhesive in your facility as well as on the job site. This product is available in handheld aerosol cans, 9 lb., 30 lb. and 150 lb. canisters.

PS13 provides a fast tacking, strong, permanent and waterproof bond.

- High Strength
- Exterior and Interior Applications

Technical Data

Westech PS13 product is formulated as a non-methylene chloride, solvent-based, polystyrene adhesive for industrial use.

Technical Data:

- Contains No CFCs

Performance Features:

- Will not degrade Styrofoam
- Formulated for rapid application
- Simple clean-up with Westech AR/CCAR adhesive remover
- Bond will hold in the presence of both heat and humidity
- Applies easily and adheres to a variety of substrates

Safety Recommendations:

Vapors may be harmful to health. Keep away from children. Use only in well ventilated areas or use respiratory protection. The product MSDS should be read and understood before use. Eye protection is required. This product is flammable. Keep away from fire or flame.

Recommended Usage:

Westech PS13 is formulated to provide permanent bonding of expanded polystyrene (EPS) materials. This product is designed for safe usage on many applications in bonding EPS foam. Applications range from bonding EPS to sheetrock, bonding EPS foam landscaping in hobby modeling, laminated EPS to itself and many other applications.

Prior to use, a small test patch should be sprayed to evaluate substrate compatibility.

This product may degrade some thin plastics and films. Some of the materials EPS13 and PSC13 will effectively bond include: plastic laminate, edge banding, automotive headliners, glass, particle board, felt, paper products, carpet, duct insulation, steel, aluminum, molded fiberglass, wood, urethane foam and many other materials.
